

A Moment in History by JoeA

Recently, Joe Biden mocked American Patriots telling them that AR-15's are not adequate against F-15's. He said that there always have been limits on the Second Amendment. That's wrong! During the late 18th and early 19th centuries American Privateers safeguarded American shipping. A Privateer is a civilian owned, financed, armed (cannon) and operated ship pursuing national interests. Biden must have forgotten about Teddy Roosevelt who used his own money to finance the Rough Riders. Roosevelt purchased fully automatic machine guns to equip his men. The machine guns, privately owned were used in the battle of San Juan Hill. In Afghanistan, a seventh century society equipped with AK-47's (like AR-15's and M-16's) humiliated Biden and his F-15's at Kabul.
